**COOLFAT-SUCTION**

Controlled cooling

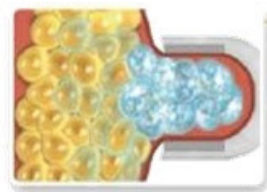

[rejubelle.com](http://rejubelle.com)

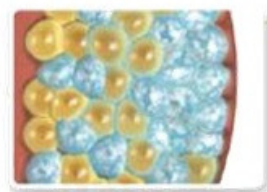

1

many of us have deposits of annoying fats

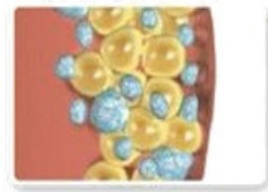

2

cool suction uses controlled cooling to attack and crystallize fat cells

3

Cool suction only affects fat cells.

4

The crystallized fat cells die gradually and are eliminated from your body.

5

In the weeks and months following treatment, the remains of fat cells are condensed, reducing the fatty layer.

6

cool suction helps you say goodbye to unwanted fat, without surgery.

## COOLFAT - SUCTION

Controlled cooling

**COOLFAT - SUCTION** is an ideal solution for all types of patients, regardless of weight or volume, since it allows to remodel the body in a definitive and painless way, without needing recovery time.

Its use is suitable in areas such as flank, abdomen, inner side of the thighs and back.

**It allows to eliminate up to 7 mm off at in each session.**

**It's a minimally invasive treatment.**

**It's a painless method. It does not involve postoperative or require special care.**

*The procedure applies in the area to be treated a precisely controlled cold and for a sustained period of time, during which the fat cells enter a sequence of apoptotic death, without affecting the surrounding tissues. After treatment, adipocytes are gradually eliminated by macrophages in the following weeks and months. The results are definitive if you follow a healthy lifestyle.*
