**FRESH-FACIAL**

10 IN 1

[rejubelle.com](http://rejubelle.com)

Facial steamer, magnifying lamp, ultrasound, skin scrubber, galvanic facial, high frequency, rotating brush, spray, vacuum and microdermabrasion.

With radiofrequency a lifting effect is achieved without surgery on the face and neck, its used for the treatment of wrinkles, expressions lines, bags and circles, jowls, skin flaccidity, etc. It consists of deep heating of the skin and subcutaneous tissue, favoring lymphatic drainage and the formation of new collagen.

The galvanic process discharges a low-voltage DC current into the skin through a conductive treatment gel that is applied in advance. One of the main benefits of a galvanic facial treatment is the improvement of oxygenation and circulation in the treated area. Galvanic loading increases the effectiveness of the products used during treatment and provides a high level of nutrition to the skin.

## FRESH - FACIAL

1 0 I N 1

*It allows to treat wrinkles and firm skin, reduces swelling around the eyes, stimulates blood circulation and increases the metabolism, eliminate black spots, freckles and age marks, facilitates the absorption of products for skin care, relaxes tight muscles and reduces inflammation.*

*Microdermabrasion is an ideal aesthetic procedure to improve the appearance of the skin. It's a technique in which the superficial layer are removed by removing dead cell and impurities, as well as improving wrinkles and scars. The equipment allows the microdermabrasion with diamond tip to be a novel system that rejuvenates the skin, reduces scars and eliminated acne. The results of microdermabrasion can be seen from the first session.*

*Ultrasonic therapy is a non-invasive, painless and fast treatment that works directly on the tissues through a muscular and molecular micro-massage, giving rise to numerous therapeutic effects used in aesthetic treatments. This procedure is very useful as a complement to other non-invasive aesthetic treatments.*
