NITRO - TREATMENT

Cryo system

rejubelle.com

For beauty applications, it's called Criofacial, extremely cold temperatures cause an instantaneous hardening of the skin, followed by an increase in blood circulation due to vasodilation after exposure to cold. Patients report "healthy glow" after criofacial. The long-term benefits are younger skin due to the natural mechanisms triggered by the body (simulation of collagen) .

Restores firmness and luminosity.
It helps to reduce pigmentation or uneven skin tone.
Helps rejuvenate tired skin.
Increases the glow of the skin.
Improves texture and skin tone.
Scars produced by acne.
Reduces inflammation.
Treatment of skin conditions such as eczema.

NITRO - TREATMENT

C r y o s y s t e m

NITRO - TREATMENT is a new type of device for facial and localized cryostimulation, which works with liquid nitrogen (LN2). Its used as a non-medical device, popular in sports, wellness and beauty application. Cold steam is used to cool selected areas, such as muscles and joints, to help reduce swelling and pain, similar to an ice pack. However, unlike frosting, dry cold is pleasant to the touch despite reaching temperatures of -140c (-220F) and lower.
