## VAGI - REJUBELLE

### V a g i n a l R e j u v e n a t i o n

*The VAGI - REJUVENATION REJUBELLE system is a non-invasive direct focused ultrasound technique on the mucosal lamina and muscle layer.*

*A high intensity is created and the collagen is rearranged into a layer of predetermined depth.*

### R e s u l t

*The treatment of VAGI – REJUVENATION REJUBELLE allows obtaining a tension of the vaginal canal thanks to the simulation of the collagen of the endopelvic fascia, achieving its hardening and thermal tensioning.*

*The vaginal rejuvenation allows to achieve a greater intimate satisfaction and a significant improvement of life quality.*

**Vaginal rejuvenation without surgery.**

**Totally painless.**

**Without incisions or sutures from surgery.**

**No risk of infection due to excessive erosion of the vaginal mucosa that can be produced by lasers.**

The vaginal relaxation syndrome is usually treated with surgery. This implies possible adverse effects and a risk is always present in any surgical intervention. With VAGI – REJUVENATION REJUBELLE the same or even better results are obtained than with other invasive treatments, without infections and without the need for rest or post-operative.
